

Club 3D announces Green Edition graphics cards series

Club 3D, european market leader for graphics cards, today announced the release of their Green Edition graphics cards line-up. With the Club 3D Green Edition series you get the latest industry-leading technology to save energy. Step in and be a part of the modern green computer users community. Club 3D Green Edition Series reduces the power consumption up to 40% compared to a standard non green graphics card. Thanks to new PCB design which drastically lowers down the thermal design power.

All Club 3D Green Edition graphics cards are equipped with silent high performance coolers with fan control to ensure a low noise in any kind of situation. Designed for mainstream multimedia & gaming PC's and also suitable for professional users. Equipped with the latest features such as NVIDIA® SLI®, CUDA® and PureVideo® HD Technology.
